Our Offices Around The World

Enterprises Have Data. But Not Clarity.

Today's Reality:

- Data spread across platforms
- Dashboards that don't agree
- AI stuck in pilots
- Low trust in insights

Business Impact:

- Slow decisions
- Higher risk
- Wasted AI investments
- Rising data platform costs

"Without clarity, autonomy fails."

Our Approach: Build Clarity First

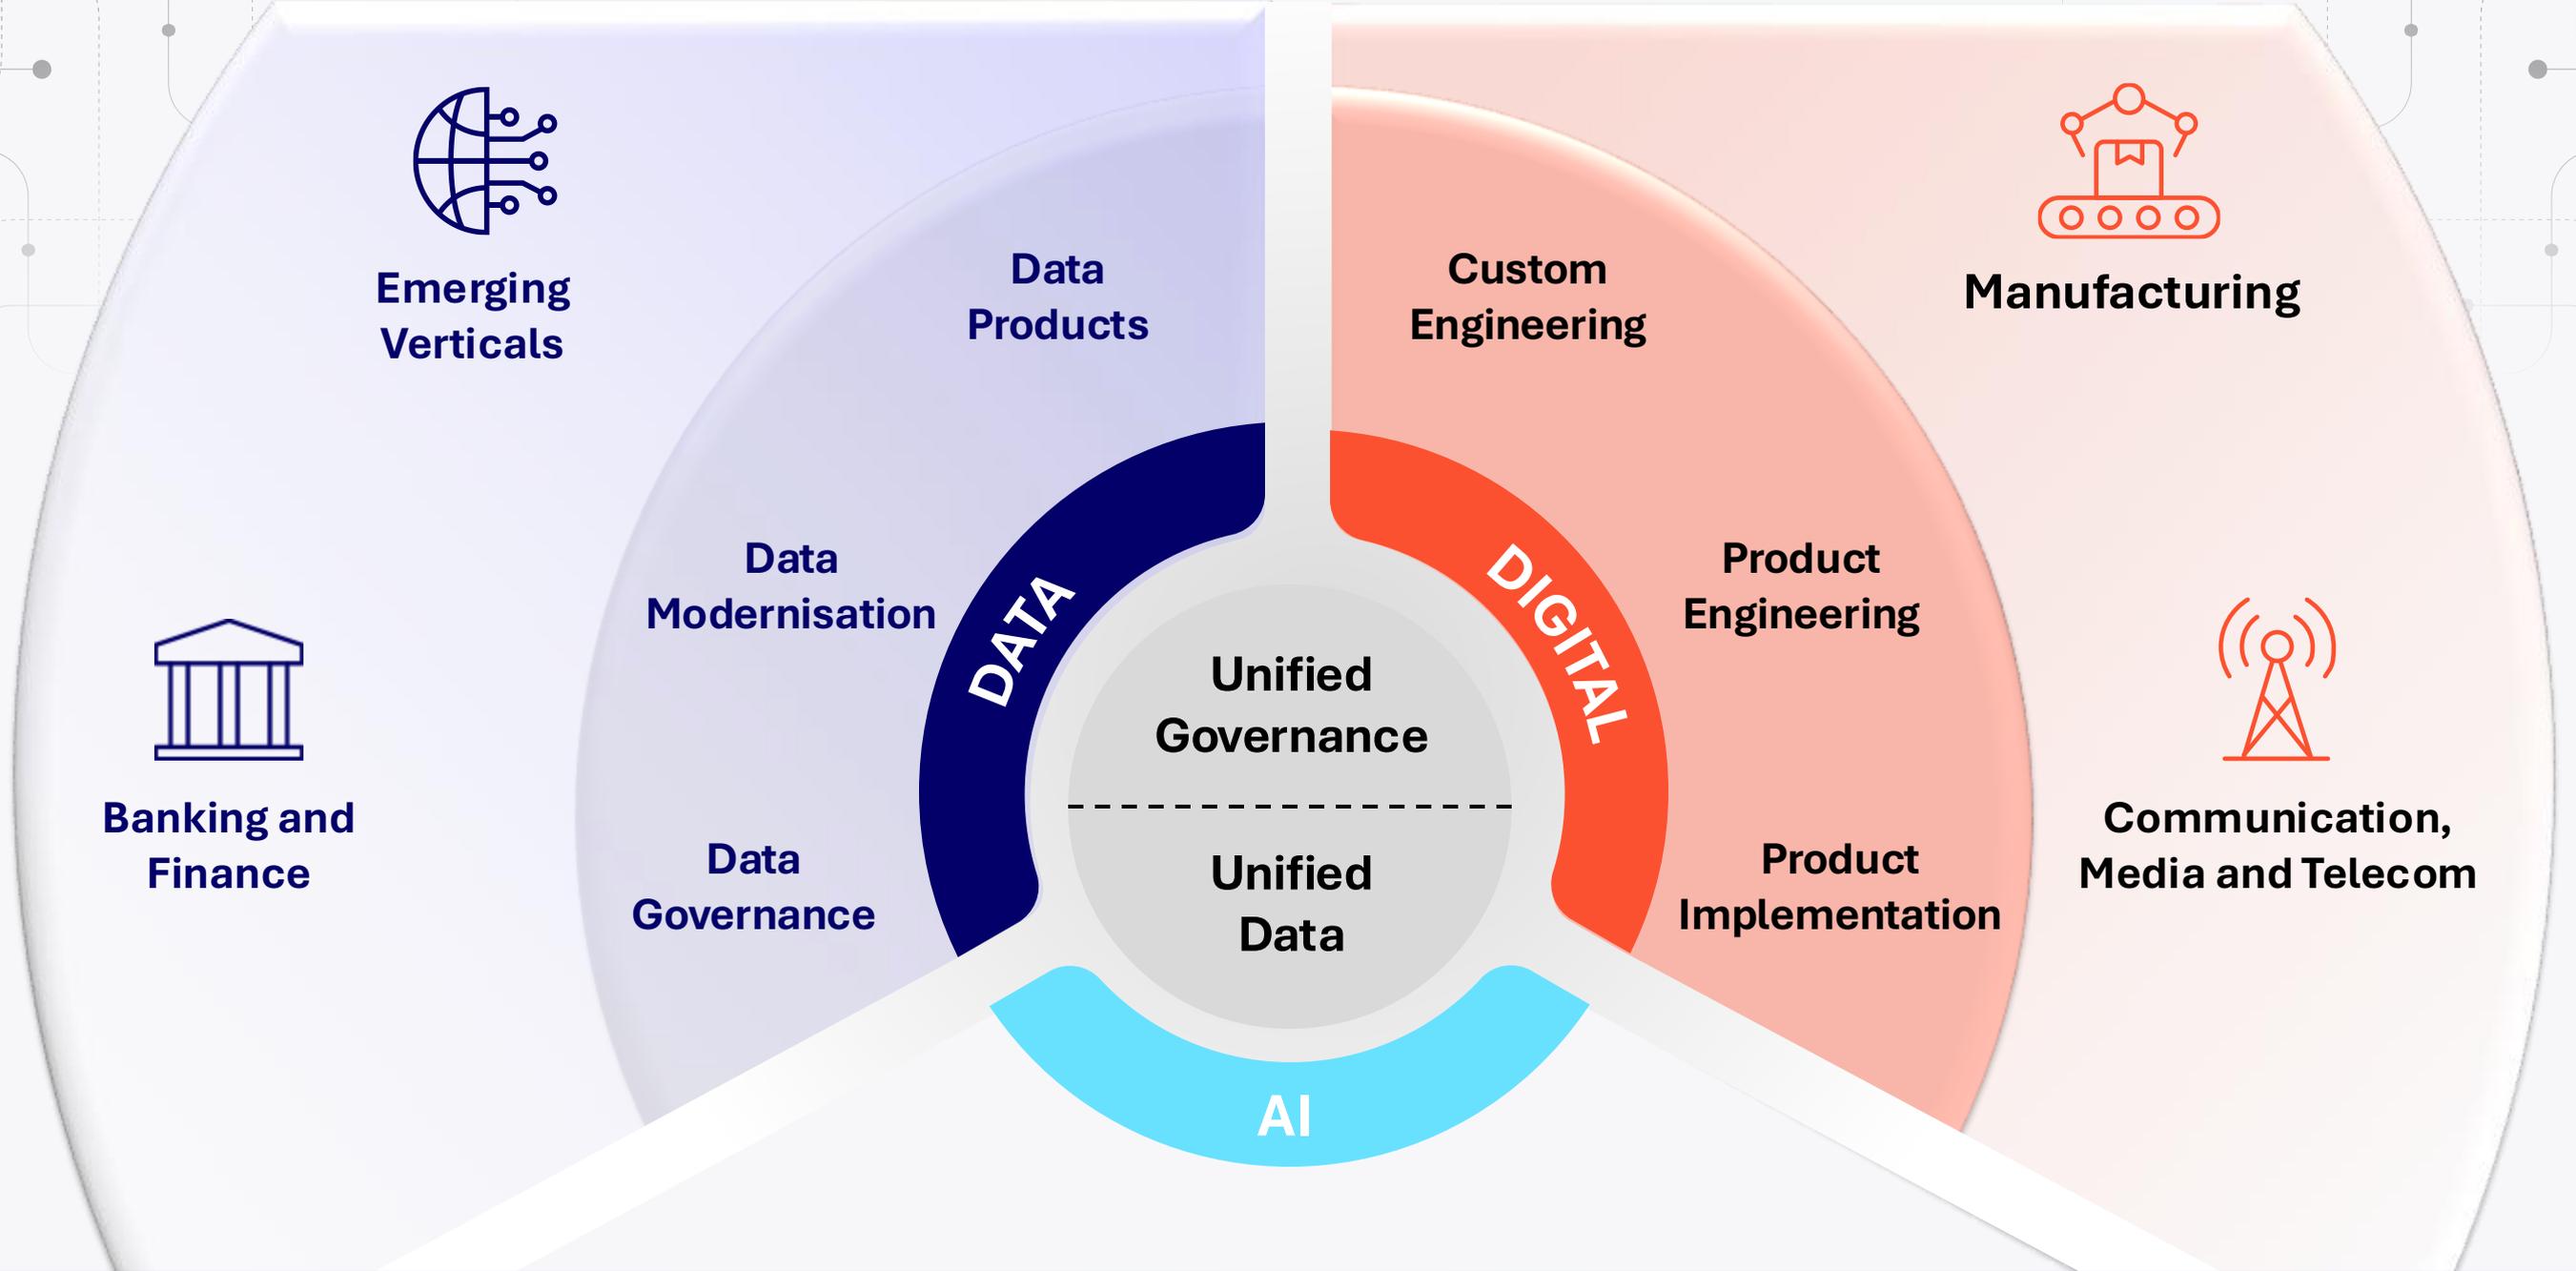

We help enterprises achieve clarity by:

- Unifying data into a modern foundation
- Standardizing business metrics
- Enabling real-time insights
- Embedding governance by design
- Making platforms AI-ready

“A single, trusted view of the business — ready for automation and AI.”

Outcome:

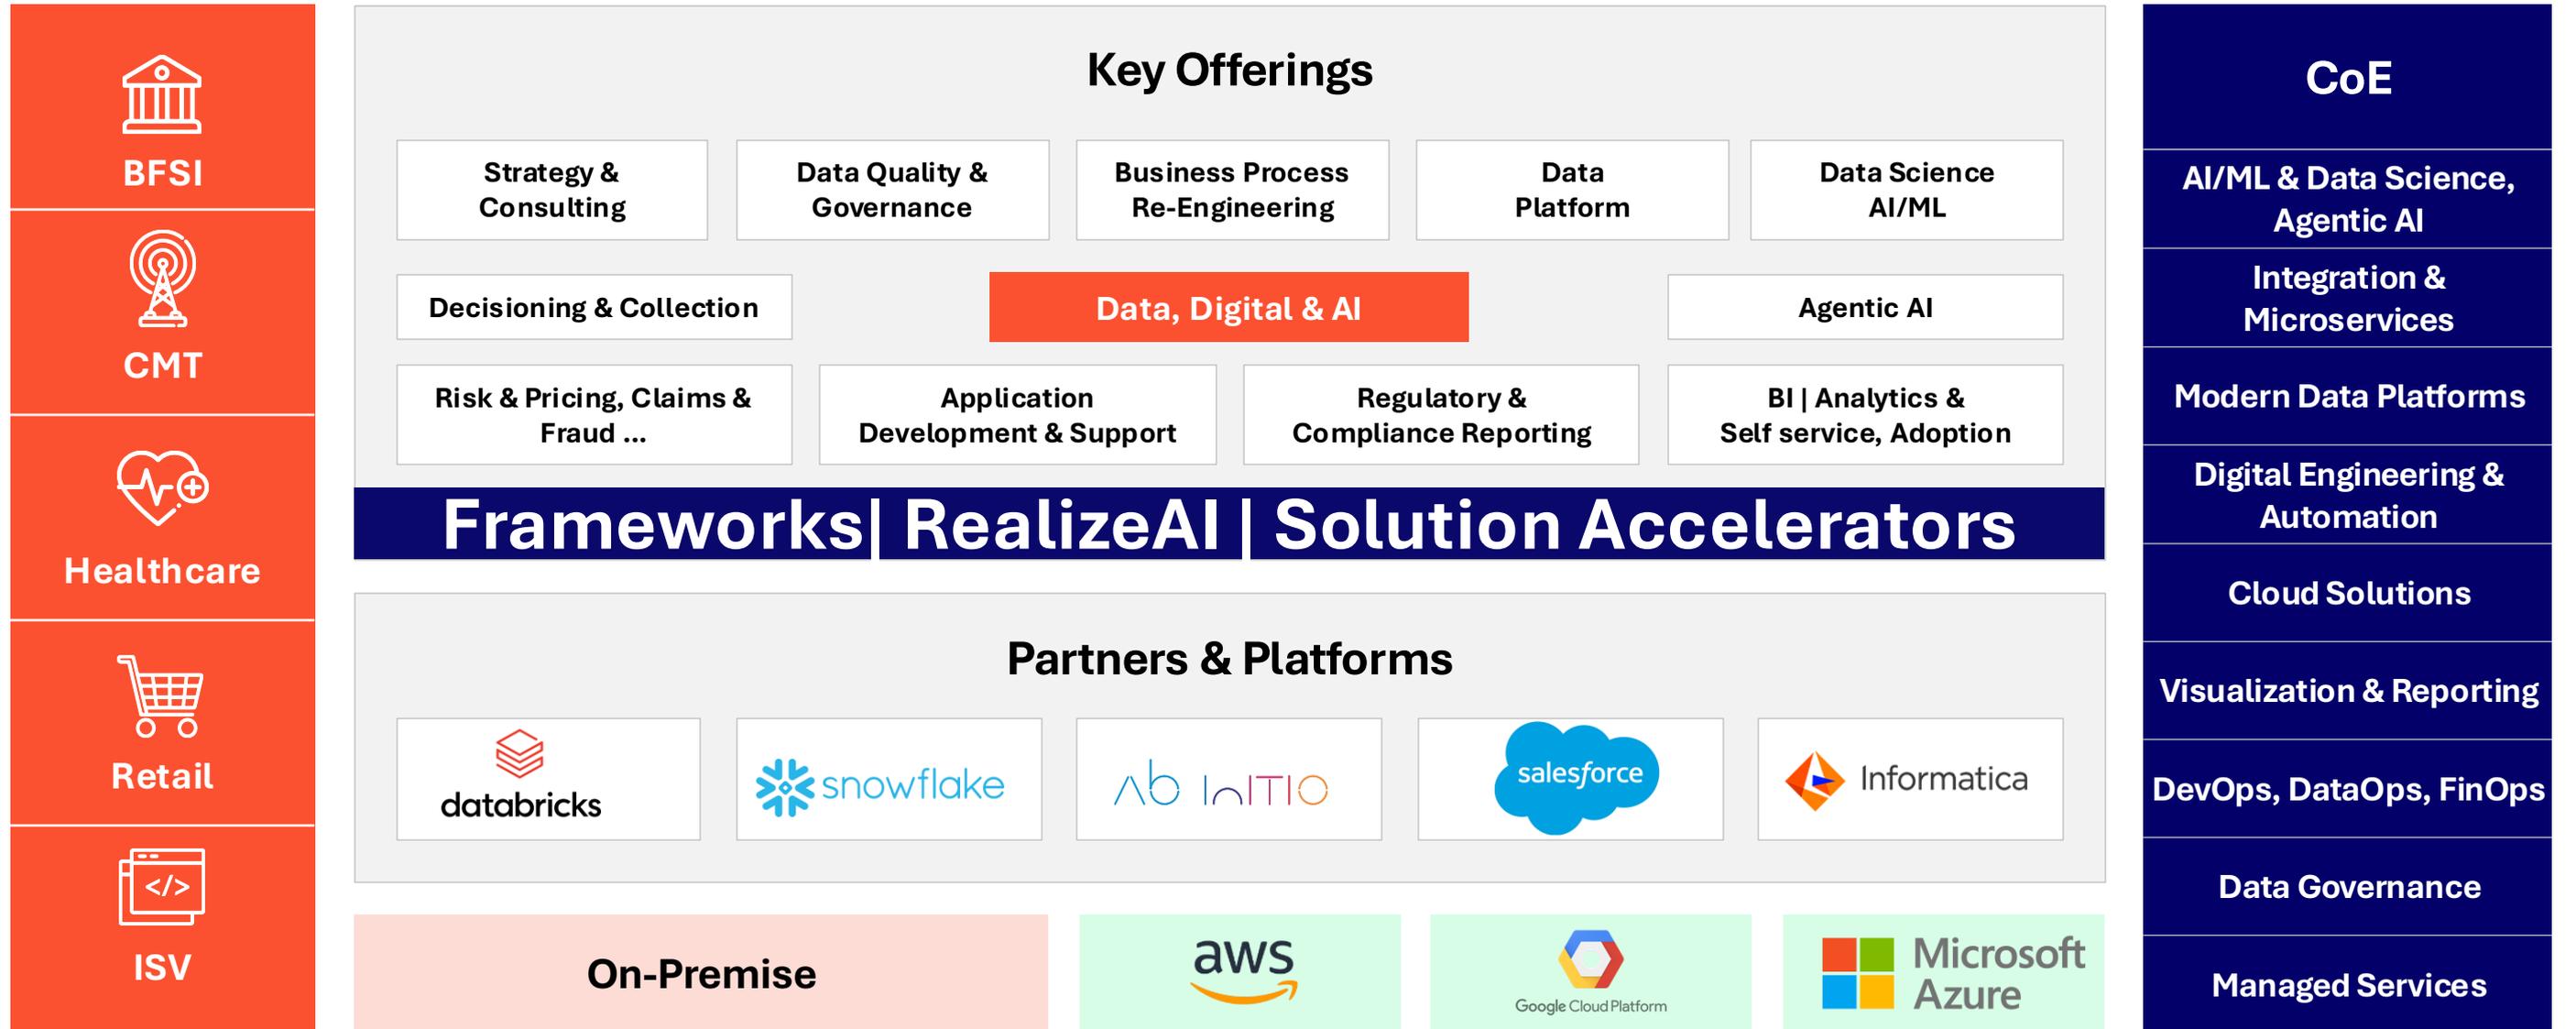

- 30–50% faster time-to-insight
- Reduced data platform TCO
- Production-grade AI at scale
- Higher trust in data

Hoonartek Capabilities

Enterprise Data • Analytics • AI

End to End - Solutions Partner

Solutions and Accelerators

DigiTwin™

- Digital Data Caching Layer
- High through-put Low-Latency
- Always On Always Available

RapidFrames™

- Low Code platform for Application development
- Low Cost with swift Delivery

DataHaven™

- A secure environment for Data Collaboration
- No physical movement of data
- Strong data governance

Frameworks & Accelerators

- MigFac-Migration Workbench
- Set of frameworks to accelerate delivery of projects

DataTrail

- Data Usage and Lineage visibility
- Pre Migration visibility

Transforming Industries with AI & Data

Demand more out of Data & AI.

SCHEDULE ONE-ON-ONE MEETINGS with our AI experts to learn how we modernize data, develop advanced analytics, and accelerate your AI initiatives.
